

Psychopharmacology Reference Guide

Dalhousie University - Ghana College of Physicians and Surgeons Programme

Purpose

This learning aid supports structured discussion with qualified supervisors and does not replace local prescribing guidance or clinical judgement.

Safe review

Before prescribing, review indication, previous response, contraindications, interactions, baseline observations and monitoring requirements.

Follow-up

Document target symptoms, expected benefits, adverse effects, adherence, review date and the plan for continuation or change.

Urgent concerns

Use local emergency and medicines-information services whenever immediate clinical advice is required.
