

Research Ethics Guidelines

Dalhousie University - Ghana College of Physicians and Surgeons Programme

Core principles

Respect for persons, beneficence, non-maleficence, justice and scientific integrity should guide every study.

Approval

Obtain the appropriate ethics approval before recruitment, data collection or access to identifiable clinical information.

Consent and privacy

Use a clear consent process and collect only the information required for the approved research purpose.

Reporting

Report protocol deviations, safety concerns and conflicts of interest through the approved institutional process.
